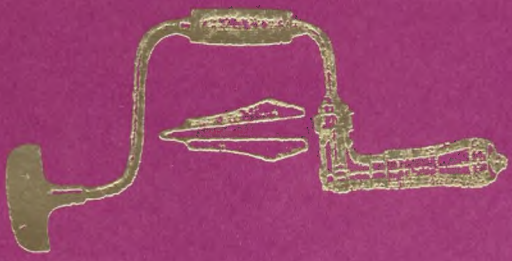
MILLERS FALLS CO.

MILLERS FALLS, Mass.



No. 74 Chambers Street, N. Y.

REPRINTED 1992 PHILIP J. WHITBY

NEW YORK, April 15th, 1878.

We wish to call attention to the fact that all our BARBER BRACES are now made of Steel, both the Sweep and Jaws, and they are all heavily Nickel Plated. Though these improvements have added largely to the cost, the price remains the same. We believe these goods will command the market wherever they are shown.

We also wish to say, in regard to the LESTER SAW, that it has been in the market less than one year, yet, at the present time, more of them are sold than of all other kinds.

Our purpose is to make the best Saw that can be made for the price charged.

As our profits are small, we cannot give a large discount to dealers.

This Bracket trade is coming to be of so much importance that Hardware dealers cannot afford to neglect it. Most of the goods in this line afford a large profit, meet a ready demand, and sell at a season of the year when business is usually dull.

We keep a full supply of all Tools, Designs, Wood and other articles needed in the business.

MILLERS FALLS CO.,
No. 74 Chambers Street,
NEW YORK.

BARBER'S IMPROVED BIT BRACE.

The only Brace in market having Forged Steel Jaws.

ROLLED STEEL SWEEP, HIGHLY POLISHED AND NICKEL PLATED,

With Rosewood Handle and Lignumvitæ Head.

	PRICES.	PER DOZ.

BARBER RATCHET BRACES.

STEEL BRACES, NICKEL PLATED.

This is the perfection of a Bit Brace, having a regular Barber Chuck, with forged steel jaws, and also Dolan's Patent Ratchet Attachment, to be used in places where there is not room to revolve the sweep. A slight back and forth motion will drive the bit in or out. All the working parts are made of steel, and the whole Brace is beautifully finished.

PRICES.	PER DOZ.
No. 31, 12 inch sweep	$39 00
" 32, 10 " "	36 00
" 33, 8 " "	33 00

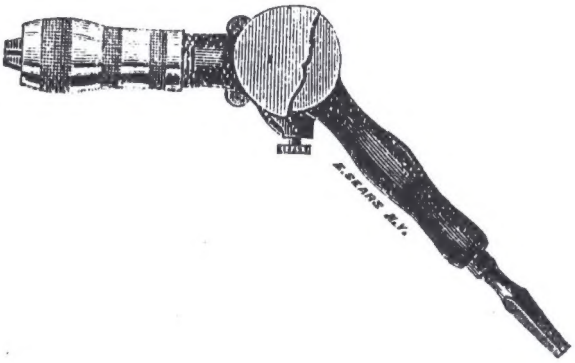
" 119, 10½ " "	. . . . .	

We guarantee to sell these Braces at the lowest market prices.

PATENT UNIVERSAL ANGULAR BIT STOCK.



The Universal Angular Bit Stock is presented to the public as a time economizer, to be used in connection with a Brace and Bit for boring holes in places where the Brace and Bit alone could not be used. As will be seen, it can be placed in the many angles or positions between the upper and lower braces (represented in the above figure). The ability to vary the angles, either at the commencement or during the operation of boring a hole, is an important feature.

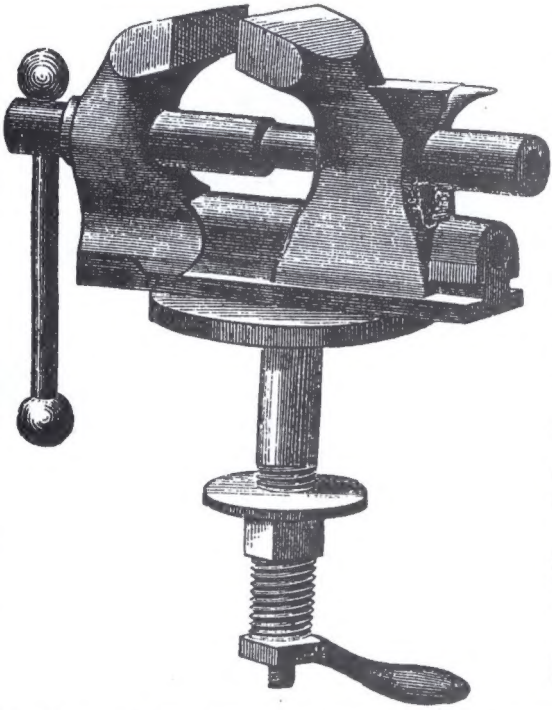
Gas-Fitters, Plumbers, Bell-Hangers, Carpenters and others, will find this an indispensable tool. It allows them to bore holes in a corner, alongside a wall, between beams, shelves, etc., in any angle or position, with the same ease and dispatch as with an ordinary Brace and Bit. It has an advantage which no wrench or other stock has, viz., durability and universal application to all places and positions. The handle to be used in places where there is not sufficient room for the Brace.

Per Dozen, - $24 00.

MILLERS FALLS VISE.

Union and Backus Vise Combined—Heavy or Chipping Vise. Covered Screw.

If seats are wanted, please so mention in your orders.



Price at Millers Falls, Mass., or 74 Chambers St., New York.

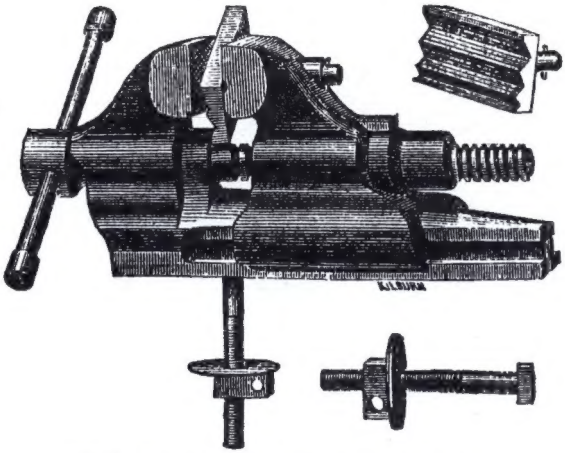
PIPE VISE.



Will hold Pipe up to 5, 7 and 8 inches.

Width of Jaw,	4	inch.	Weight,	57	lbs.	Price,	$17	50
" "	5	"	"	79	"	"	23	00
" "	8	"	"	153	"	"	33	00

"PIPE" VISE, showing extra jaw in place. The extra jaw has corrugated grooves of different sizes, by means of which pipe of any dimensions may be firmly held without injury, and without the necessity of screwing up the Vise excessively tight. The extra jaw may be removed in a moment when the Vise is wanted for other work (See Cut). This Vise is made extra heavy and strong, with very heavy and deep jaws. (See Cut.)

The 8 inch allows the extra jaw to be used on either side, so as to hold large pipe perpendicularly. The 4 and 8 inch have covered screws.

A bolt for securing the Vises to the bench, with patent nut, is included in all the sizes without extra charge.

FINISHING VISE.

Width of Jaw.	Weight.	Price.	With Seat, Extra.

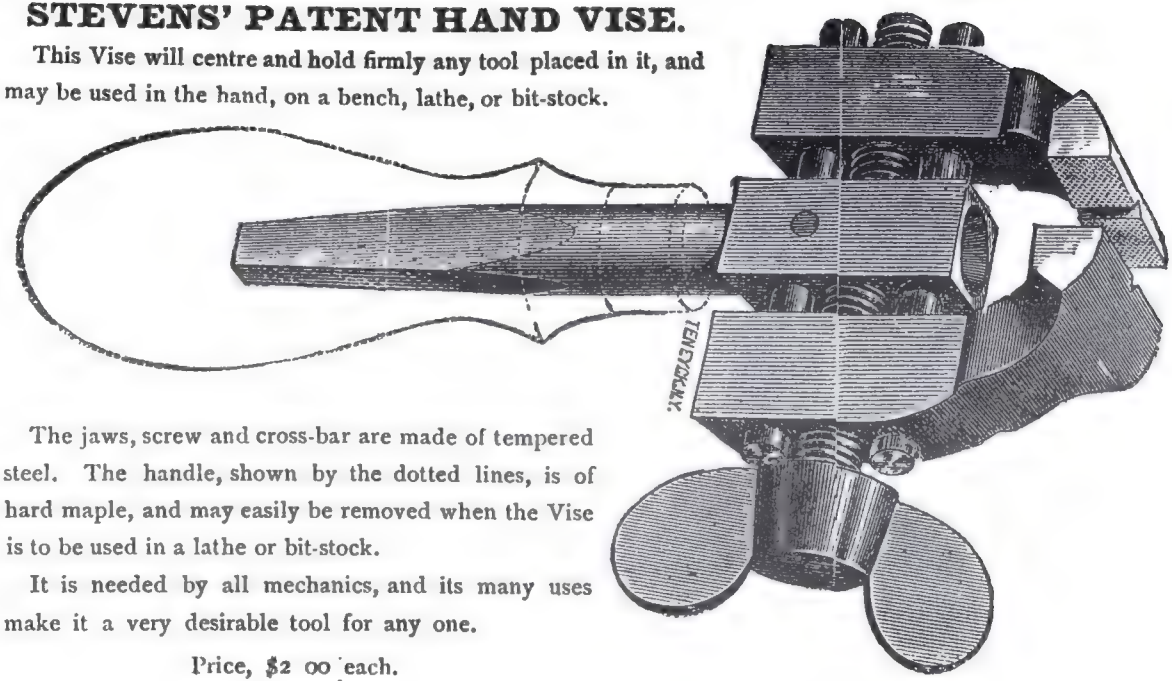
The best cheap Vise in use.

Jaws, steel faced.

STEVENS' PATENT HAND VISE.

This Vise will centre and hold firmly any tool placed in it, and may be used in the hand, on a bench, lathe, or bit-stock.



The jaws, screw and cross-bar are made of tempered steel. The handle, shown by the dotted lines, is of hard maple, and may easily be removed when the Vise is to be used in a lathe or bit-stock.

It is needed by all mechanics, and its many uses make it a very desirable tool for any one.

Price, $2 00 each.

PRATT'S PATENT

Elastic Boiler Tube Scraper.

We say this is the leading Tube Scraper in the market, and the best one.

If you order them, and find out that this is not true, return with charges for cost and trouble.

The price is strictly One Dollar per inch. We will allow the Hardware Trade a large discount, so as to make it an object for them to introduce it.

THE IMPROVED

Pat. Universal Angular and Ratchet Drilling Machine.

MILLERS FALLS COMPANY,

Sole Owners and Manufacturers.

FOUR THOUSAND MACHINES IN USE.

They will work at any angle. By placing the crank on the drill spindle, it will work with a ratchet or without. We send a chuck with each machine which will hold 1–16 to ½ inch drills.

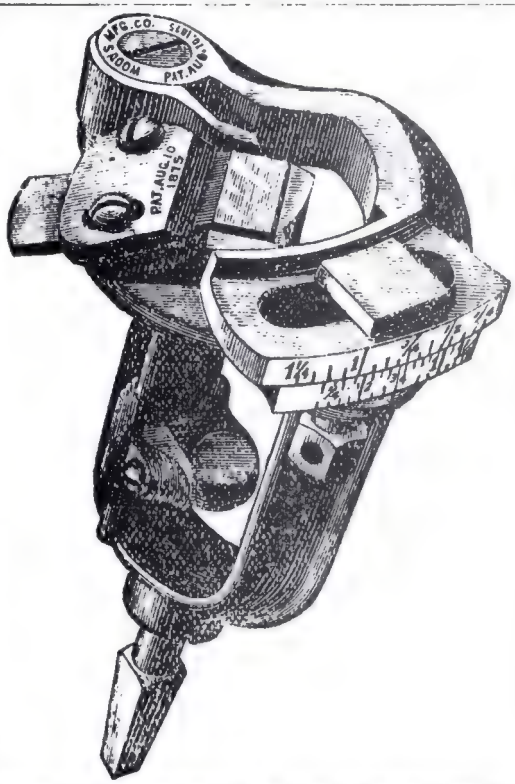
WOOD'S PATENT ADJUSTABLE HOLLOW AUGER.

Price, $4 00.

Adjustable Spoke Pointer, with malleable Shank, 75 cents.

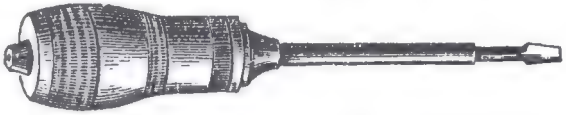


The knife has an independent lip, and *only* requires *resetting* when sharpened. The jaws of this Auger are Steel Castings. The knife and adjusting bolt and nut are *forged* from the best refined Cast Steel.

The difficulty heretofore experienced of cutting any and every size, in order to accommodate variation in bits, is entirely overcome in this Auger. The scales are laid off in sixteenths, from $\frac{1}{4}$ to $1\frac{1}{4}$ inches, and are perfectly accurate when the knife is set so that the tenon will fill the jaws, which, having three bearings, will always make the tenon round and perfect. To cut any variation from the sixteenth, it is only necessary to make an allowance on the scales as it would be done on a rule. In repairing, to duplicate a tenon, close the Auger Jaws on the old one and it will cut the new one the same size.

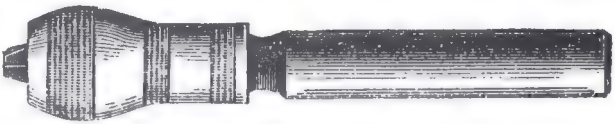
These Augers have been thoroughly tested. The parts are perfectly duplicated, and the material and workmanship are guaranteed.

BARBER'S EXTENSION BIT HOLDER.



Price, $15 00 per dozen.

BARBER'S LATHE CHUCKS.



Price, $18 00 per dozen.

FORGED STEEL SCREW DRIVERS.

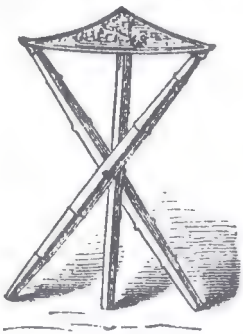
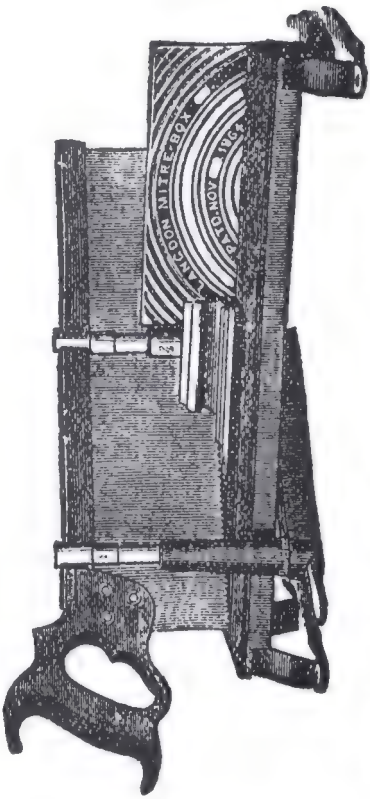
PORTABLE CAMP STOOL.



Made of second growth ash. Weight, one pound.
Price, $6 00 per dozen.

THE LANGDON MITRE BOX.



The manufacture of the **Langdon Mitre Box** was commenced in the beginning of 1872. Thousands of them are now in use and giving universal satisfaction. In answer to the increasing demand, we are now manufacturing four sizes, which are supplied with Henry Disston & Sons' Saw. Prices are uniform, and strictly adhered to in all cases.

As at present constructed, this Machine is indispensible to every Printer, Carpenter and Joiner, Cabinet Maker, Furniture Dealer, Organ Manufacturer, Car Manufacturer, Picture Frame Maker, Wagon Maker and all workers of wood.

It is a standard article of trade, and may be found in the hands of dealers in Hardware, Mechanics' Tools, Printers' and Photographers' stock generally.

Each Box is provided with a STOP GAUGE for holding the Saw in sawing Tenons, Rustic Frames, Scarfing and similar work; is adjustable at any desired angle or depth of tenon within the capacity of the saw.

Cuts as Perfect Joints as is Possible with a Saw.

Work must be held firmly to make good joints.

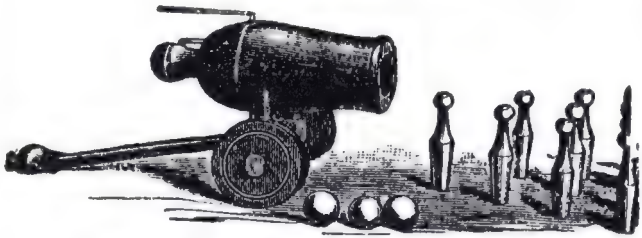
TOY CANNON.



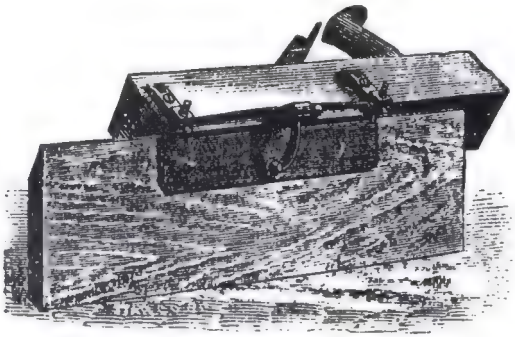
This pretty toy is made of wood, well finished and mounted on wheels. The projecting force is a strong spring within the centre of the gun. The Cannon is about eight inches in length. Several wooden balls and a set of "Nine Pins" accompany it. These balls can be thrown twenty-five or thirty feet, and with a little practice the "Pins" can be quite successfully "bombarded" at that distance.

Price, per dozen, $9 00.

THE ALEXANDER

ADJUSTABLE JOINTER GAUGE.

Patented July 16, 1872.



We claim for this tool:

1st.—The ease with which it is attached to any Plane, Jack or Jointer.

2d.—The great amount of time saved, without the use of Bevel or Try Square.

3d.—Is adjustable for squaring, or to any Bevel desired.

4th.—The work completed in the highest state of perfection, even by inexperienced workmen.

Attach the Gauge to the plane so that the depression in the centre of the wing of the Gauge shall be directly opposite the cutting edge of the plane iron.

Price, . . . $18 00 per Dozen.

MILLERS FALLS BREAST DRILL.

In the light of all modern improvements we have made the nicest Drill Stock in market, and attached to it a new and very ingenious Chuck, which will centre and hold perfectly round, square or flat tool shanks from 1-16 to ½ inch. The jaws are made of steel, and will hold any shape tang. As the price is not much above ordinary Breast Drills, we look for large orders.

The Tools in the cut do not go with the Drill, but are placed there to show some of the shapes the Chuck will hold.

PRICE.

Per dozen, ... $30 00

HAND DRILL.

Six Drill Points with each of the above Drill Stocks.

No. 2. Single Gear, holds 1-16 to 1-4, ... $30 00

These Drill Stocks are made of malleable iron, with steel spindle and rosewood head and handle. The jaws are of forged steel and will hold perfectly any size Drills named above.

They are the only Drill Chucks in use which will hold such a variety of Morse Twist Drills.

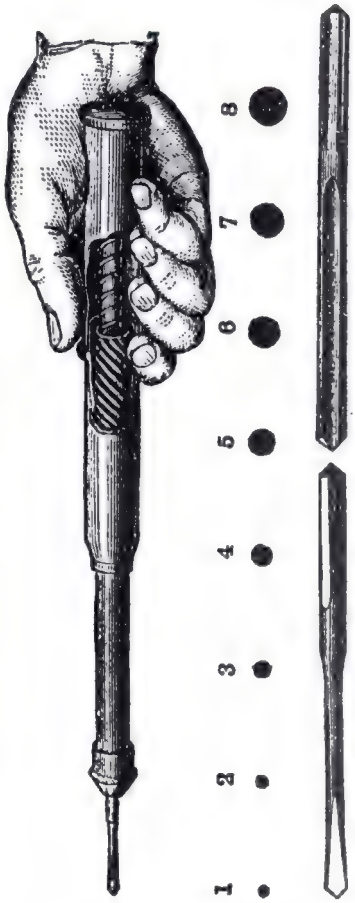
DRILL POINTS.

1 2 3 4 5 6

Price for set of six Drills, ... 25 cents.

The cut represents the exact size of the Drill Points.

JOHNSON'S AUTOMATIC BORING TOOL.



This instrument is designed for boring wood for various purposes, such as for setting Brads, Finishing Nails, Screws, etc., eight Bits (or Drills, sizes indicated by dots and numerals above) accompanying each tool. It can be used in many places where the bit-brace, gimlet or brad-awl cannot, and is superior to either for the purposes mentioned. Piano-forte and organ builders, as well as cabinet makers and house carpenters who have used them, all attest their great value as a tool for doing work rapidly and perfectly.

When Nos. 1, 2 and 3 are sharpened for drilling metals, they will work with satisfaction in brass and compositions, which makes it a useful tool for dentists, jewelers and, in fact, all artisans.

Price, with Drills, Per dozen, . $27 00

GRAVES' AUTOMATIC

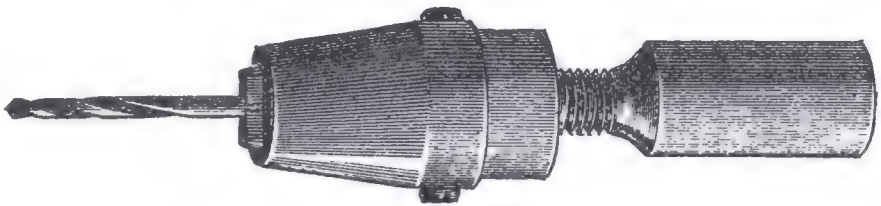
DRILL STOCK AND DRILL POINTS.

This is a new invention and is a most complete tool for Bracket Saw Work. The Stock is make of rosewood, with steel Spindle.

The Drill Points are easily adjusted by means of a brass Thimble, which screws on to the end of the Spindle. It is easily worked with one hand, and will drill the most delicate wood without danger of splitting.

Price with one dozen Drill Points, assorted, in rosewood box, $1 00; $12 00 per dozen.

STAR CHUCK.



No. 1, with Shank 1–2 inch in diameter and 2 inches long, holds Drills from 1–64 to 1–8 inch. Price, $1 25 each.

No. 2, with Shank 5–8 inch in diameter and 3 1–2 inches long, holds Drills from 1–32 to 1–4 inch. Price, $2 00 each.

These Chucks are simple in construction, strong and durable, and are warranted to hold the MORSE TWIST DRILLS firmly without danger of breaking. The Shanks (or Mandrels) are centered so they can easily be fitted to any lathe desired. The above cut represents No. 1 full size (except in length of Shank).

LESTER SAW.

This is the Saw of the period, and more of them are being sold than of all other kinds in the market. Many thousands of them are now in use, and every one, so far as we have heard, is giving satisfaction.

The New LESTER SAW is made of iron, with all the working parts of steel, and weighs 50 pounds.

It is handsomely painted red and green, with red stripes, and presents a beautiful appearance. Those parts which are not painted are either polished or Japanned.

It consists of, first, a SCROLL SAW, with Tilting Table for inlaid work; arms 18 inches in the clear; clamps which will hold saws of any length or width, and face them in four different directions; cutting lumber from one-sixteenth to one inch in thickness; speed, 1,000 strokes per minute.

Second, a CIRCULAR SAW, two and one-half inches in diameter, which will cut lumber one-half inch and less; with an iron table four by five inches.

Third, a DRILLING ATTACHMENT, with six Stubs' Steel Drills of various sizes for wood or iron work.

Fourth, an EMERY WHEEL, with wide and narrow rim.

Fifth, a TURNING LATHE, with iron ways and rest, steel centers, and three best steel Turning Tools; length of way, 15 inches; distance between centers, 9 inches; swing, 3 inches; length of slide rest, 4½ inches; number of revolutions per minute, 7,000.

Also, with each Machine, six Saw-blades, a Wrench, Screw-Driver, extra Belt and two sheets of Designs, with a nice box for the small tools and a box for the whole Machine. It is taken apart when shipped and packed in a box, but the working parts are all left in place, and the frame is put together again by a single bolt.

Price for every thing above named, . . .	$8 00
The same without the Lathe and Circular Saw, .	6 00

When desired, we furnish with the Lathe a very nice Drill Chuck for working metal, and a Tail Stock, with Screw Center, for $2 00 extra.

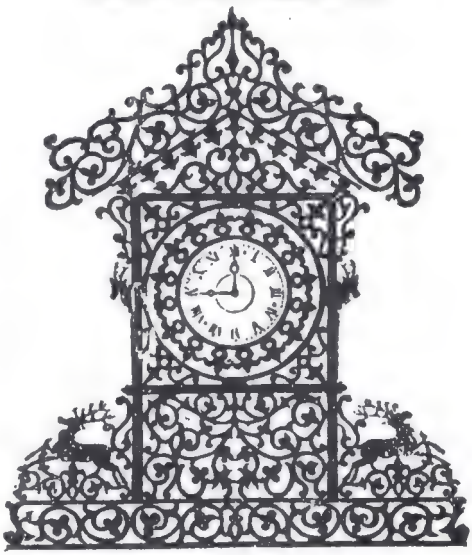
CLOCK MOVEMENTS.



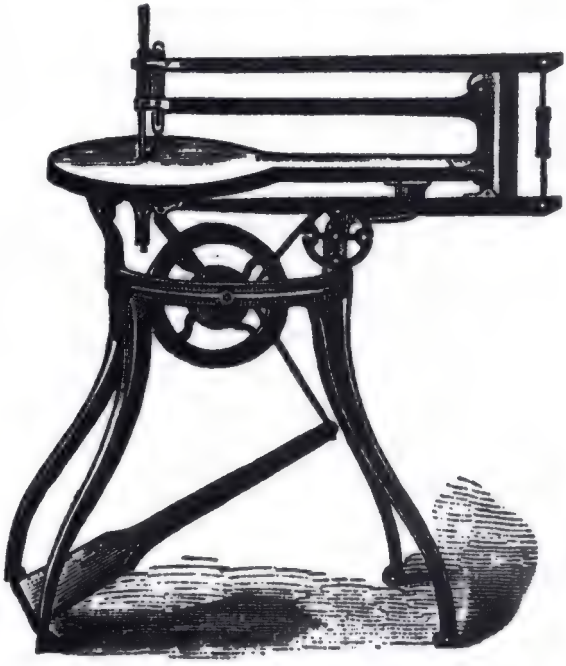
No. 1. Marine (Spring) movement with 2½ inch (Brass) Sash and Dial, complete, runs thirty hours, $1 50 each.

No. 1, with Nickel Plated Sash, $1 60 each.

No. 2. Pendulum movement with three inch Nickel Plated Sash and Dial, runs eight days, $2 25 each.

These prices are for the movements alone. They will fit the frame shown in this cut, and also several others in our list of designs.

SCROLL SAW.



There are many styles of Foot Power Scroll Saws in use, each having some peculiar excellence. This Saw will do both fine and coarse work, using Saw-blades from three to eight inches in length, and any degree of fineness. The clamps which hold the Saw are so made as to face the Saw in any direction, enabling the operator to split a long and wide board in the middle.

The work is held down by a presser-foot when desired. The table is made of hard maple, and stands three feet above the floor. The arms are twenty-four inches long in the clear. The speed is about one thousand strokes per minute. For carpenters' use in doing heavy work it has no equal. Price, $25 00.

BRACKET SET,

No. 1.

This set embraces one Steel Spring Saw Frame, nickel-plated, with rosewood handle; one New Automatic Drill Stock, with rosewood handle, Steel Spindle and Brass Thimble; one doz. Drill Points, in rosewood box; three sheets of new Designs; one dozen Saw-Blades; one sheet Impression Paper; one Nickel-plated Iron Plane and one pair of Pliers. All put up in nicely finished wood box, making a complete set of tools for Bracket Saw Work. Price, $3 00; $36 00 per doz.

BRACKET SET, No. 2.

NICKEL-PLATED, WITH ROSEWOOD HANDLE.

These sets are packed in paper boxes, and embrace a Spring Steel Saw Frame 5 x 12 inches, having Patent Clamps for holding the Saw-blades. Fifty full sized designs, embracing a great variety of fancy and useful articles; six Saw-blades, one Awl, one sheet of Impression Paper, and full directions for using the Saw.

Price, - - $15 00 per dozen.
